

Rittal GmbH & Co. KG – Power and Vision!

Mastering product variety globally with ⁴PEP Material Master Management

Rittal has continuously evolved to become the world's leading systems provider for enclosures, power distribution, climate control, IT infrastructure as well as software and services. Today, Rittal offers a perfectly coordinated system platform that combines innovative products, pioneering engineering solutions and a global service for a wide range of requirements. All from a single source, all in top quality, also made possible by using ⁴PEP Material Master Management.

“We have grown fond of ILC and their staff for being a professional and strategic partner in our projects. They have always suggested possible ways to the right or to the left, presented the pros and cons to us and have thereby allowed us to move our projects forward in an efficient and, most notably, an error-free way.”
